SAT test comprises of English and Math. At AGS, we extensively cover both subjects, with special focus on the methodology of attempting the test. We offer six weeks course with 45 minutes class of each subject every day, five days a week. The classes are in progress around the year on all campuses of AGS. SAT at AGS is taught by highly qualified and experienced teachers.

Registration Fee: 5000/Rs

Course Fee: 25,500/Rs

Test Preparation Starting Date: Call us for details

About SAT

The SAT Reasoning Test (formerly Scholastic Aptitude Test and Scholastic Assessment Test) is a standardized test for college admissions in the United States. Many local universities entry tests are SAT based. Students can also submit their SAT results for admission in local universities in Pakistan for the undergraduate programs.

Subject Tests

Subject Tests (formerly SAT II: Subject Tests) are designed to measure your knowledge and skills in particular subject areas, as well as your ability to apply that knowledge.

Students take the Subject Tests to demonstrate to colleges their mastery of specific subjects like English, history, mathematics, science, and language. The tests are independent of any

particular textbook or method of instruction. The tests' content evolves to reflect current trends in high school curricula, but the types of questions change little from year to year.

Many colleges use the Subject Tests for admission, for course placement, and to advise students about course selection. Used in combination with other background information (your high school record, scores from other tests like the SAT Reasoning Test, teacher recommendations, etc.), they provide a dependable measure of your academic achievement and are a good predictor of future performance.

Some colleges specify the Subject Tests they require for admission or placement; others allow applicants to choose which tests to take. All Subject Tests are one-hour, multiple-choice tests. However, some of these tests have unique formats.

The Subject Test in Biology E/M contains a common core of 60 general-knowledge multiple-choice questions, followed by 20 multiple-choice questions that emphasize either ecological (Biology E) or molecular (Biology M) subject matter. Before testing begins, you must choose which test you will take, either the ecological or molecular. Students are not allowed to take both tests in one sitting. If you do, your scores may be canceled.

The Subject Tests in Mathematics (Level 1 and Level 2) have some questions that require the use of at least a scientific or graphing calculator. Mathematics Subject Tests are developed with the expectation that most students will use a graphing calculator.
